https://www.100test.com/kao_ti2020/10/2021_2022_Version_99_c7_10123.htm 强烈建议：我们刊登网友提供的写作范文目的是为了让大家了解作文的写法，考生切不可背范文，否则有可能考到非常低的分数，甚至可能是零分，切记！！发信

人:nbsp ; synyan(孤单一吻) Version 99Some people think that machine translation is highly developed in today ' s society.

Therefore it is not necessary for children to learn a foreign language. What ' s your opinion?With the rapid development of modern science, computers have been playing a more important role in our daily lives. It is such a worldwide trend that there is no exception for Chinese.Many people regard the computer as the magic machine. It can solve many problems quickly and efficiently, and best of all, it can translate all kinds of languages. By using the computer you can just put ail the original versions into it and then you will get the fast translation. So some parents raise doubts about the necessity for their hildren to learn foreign languages so hard any more.At first thought, it seems that the computers can really help us to do so. But if you look in- sue the matter deeply, you may find a different answer. First of all, machines can neverreplace mankind. Computers are created by man and are controlledby human brains. We can never rely too much on machines ; otherwise,we will become the slave of them one day. On the contrary, weneed to enrich our knowledge as much as possible so that we cancatch up with the fast pace of the world. It is very necessary to learn more languages so as to upgrade our abilities

to follow the progress of the world. And furthermore, it will do good to children if they learn more languages. Both their brain and their thinking modules can benefit from it. When they grow up, they can easily accept various kinds of cultures and communicate with foreigners, which can favorably enhance the mutual understanding and develop international brotherhood. So, we can clearly see that, though computers can be good translators, people still need to learn more languages with a view to improving their abilities and facilitating their future communication with people from other cultures. - - -

- - 2、 An argument occasionally these days is that some people often think machine translation can take place of the children's study of a foreign language. As far as I am concerned, I can't totally agree with this opinion. It first comes to the point that machine translation is not ; words or pieces of half-baked sentences. So we human beings (especially children) may not rely on this kind of machine, at least, recently. On the other hand, if the real machine that the whole sentence can be translated completely turn to reality, children should not be taught not to study a foreign language. ; language, he is not discover an unknown area, but will his logic and ideation.

Additionally, even if the machine will be out of work one day occasionally in future, he can talk with other foreigners freely. Frankly, the loss of a language sensitivity is much popular these days. Many people's speaking and grammar is terrible. Children often study wrong speakings from annoying TV programs and ; ;
