: Nowhere in the world has the issue of wild animals been so much debated as in our society. Nowadays, the habitat of wild animals is being destroyed, but many people think that it to be insignificant to protect these wild animals. The above point is absolutely wrong, this essay will outline three reasons. The main reason is that people should not master existent right of animals. Not only people but also wild animals have the right to live. More and more wild animals are rapidly disappearing from this globe, it couldn ' t be divided with that natural environment was destroyed. It is unfair to wild animals

whose existent rights are being ignored. Another reason is that biologic diversity should be protected. In the future, it will be terrible and alone definitely if only people survive on this globe. Also, the variety of species has an important scientific value. For instance, invention of radar was based on ultrasonic of bat. Last but not the least reason is many wild animals are not protected, it means the natural balance will be broken, people will face challenges and problems. People destroyed environment of nature, resulting a smaller in habitat for wild animals. Also, the problems of environment have already affected oneself of people. If people couldn ' t amend current status, it will be the biggest bale of them. In conclusion, people ought to pay out plenty of money for improving existent environment of wild animals. This behavior doesn ' t have the meaning of alms. On the contrary, it just means atonement.

范文二 : Biological diversity has never been so threatened as it is today as a result of the process of human civilization. The various forms of pressure created by human activity have destroyed natural balance, led to the deterioration of natural habitats, genetic erosion and the rarity, even disappearance, of a number of plant and animal species. As the pace of civilization accelerates, more people, taking more space, needing to use more natural resources, engaging in ever-growing consumption, impose severe deterioration on the habitat of animals. An increasing number of people come to realize that the disappearance of animals will result in serious threat to the equilibrium of ecosystem. Simply put, the extinction of hawks, a rat-eating bird seen in many regions, will result in the rapid

propagation of rats. And rats, further, will destroy the prairies and threaten the other animals like gazelles, zebras and others, who live on grass and green lands. The coexistence of animals and human beings creates perfect harmony and brings about the vividness to our planet. It is hard to imagine what our world would be like without animals. Sociologists also point out that the disappearance of animals can cause social and economic problems. Animal trade, as a supporting sector to the world economy, was very active before. However, the situation is beyond control since animal trade is very profitable and alluring. Many species cannot escape the adversity of being killed. Certainly, our diet cannot be without meat. There are living stocks, which can provide us with sufficient and nutritious produce. Therefore, we need not to resort to wild animals, especially the endangered ones. To protect animals is to protect our living environment. Every individual should join efforts to keep the diversity of animals. (288 words)

范文三 : With the development of society, there are more and more problems brought to our attention, one of which is that wild animals have no place to survive in the 21st century. Some people think that the protection is a waste of resource. From my point of view, I disagree with this statement for some reasons below. Firstly, the animals and human beings are creatures created by God. Although as Darwin said, “ Survival is the fittest. ” we are human beings who have thought. We can ’ t behave like barbarians and destroy the environment where animals live. We need places to survive and so do animals. Therefore, we ought to give them a wonderful and natural place to survive. Secondly, there are a

lot of species of animals on the earth. They are just like our neighbor. For example, in my childhood, I went to my grandparents ' home in the countryside every weekend. Not far away from the house, there is a forest. Sometimes, I go there with my cousins and brothers. We met a lot of little wild animals there such as, monkeys, snakes, rabbits and so on. However, there are a lot of people who may agree and have their own opinion concerning this case. From my angle, we, human beings, can ' t deprive the survival rights of animals. On the contrary, we have to protect them from extinction. Just imagine how horrible the world would be if human is the only creature in the world. Hence, the government should educate people to preserve and protect our neighbor, natural wild animals. v105范文

: Nowhere in the world has the issue of animals been so much debated as in our society. Nowadays more and more meat was provided for people, therefore many people think that animals are being killed just for food, and this kind of action is cruel for animals. The above point is absolutely true ; this essay will outline three reasons. The main reason is that people should not master existent right of animals. Not only people but also animals have the right to live. More and more wild animals are rapidly disappearing from this globe, it couldn ' t be divided with that animals were hunted and killed cruelly. It is unfair to animals whose existent right was only exchanged with people ' s food. Another reason is that if people do not eat meat, their health will not be affected. The tenet of Chinese Buddhism forbids monks to kill any animals and eat them. Moreover the Chinese Kongfu comes from the Chinese temple that is famous

in the world. The Chinese monks ' healthy physique proves that cookbooks do not need have meat. Last but not the least reason is that people have already made all kinds of man-made meat, so they do not have to eat animal meat. Man-made meat contains enough nutrition for healthy people, but it taste isn ' t better than animal ' s meat. At least, we do not have to kill animals in order to satisfy our appetite. In conclusion, the important thing is to stop killing animals before it ' s too late. Otherwise we will lose them. ; v106idea: 同意会比较好写,1.通过数据来验证,这是很强有力的(数据可以自己编)2.从医学角度,吸烟有害健康3.吸烟可以传播很多都是被动吸烟者,谈谈被动吸烟的坏处范文 : Nowhere in the world has the issue of tobacco been so much deb 100Test 下载频道开通 , 各类考试题目直接下载。 详细请访问 www.100test.com
