The Government of China has already made great efforts to organize people to improve the environment in the light of local conditions. We have to redouble our efforts to further raise people ' s awareness of the environment. Mass media are needed to further publicize environmental policies, further spread knowledge about the environment, and mobilize the public to participate actively in environmental protection.

The Advantages and Disadvantages of E-mail  
E-mail is getting more and more popular due to the rapid development of computer. E-mail has entered many families and offices, and come to almost every student and teacher in universities, and almost every government officer. Nevertheless, every coin has two sides and so does the E-mail. On one hand, E-mail is popular now because it has its own advantages. First of all, it is fast. Within a few seconds, your message will reach its

destination. Besides, it is also very cheap. It costs you only a few Fen to deliver an E-mail. On the other hand, it also has some disadvantages. For one thing, if a computer is broken down or affected by virus, the message will be delayed or damaged. For another, the message is likely to be discovered by those who are not expected to read it. Weighing the merits and the defects of the E-mail, I am inclined to believe that the E-mail will have a bright future, and it will be more popular.
