According to a recent survey made by some experts, about 47% urban residents travel regularly, and 28% rural residents also make their tour across the country. The survey also shows that more people are interested in tourism, and will join the army in the future. Facing this tendency, we can't help exploring some underlying factors that are responsible. In the very first place, with the policy of reform and opening up, Chinese people's living standard has been greatly improved, and therefore, most of them can afford to travel around. What's more, it is believed that people now take a more positive attitude to tourism, and regard it as a life style. In addition, tourism facilities are becoming better and better. For example, transportation develops fast, and many scenic spots are available now. Though there are still some problems with tourism, I personally believe that tourism should be playing a key role in our life. I also hope that our government will make policies to create a better environment for tourists. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
