The Increase in the Number of Chinese Traveling Abroad
What is shown in the chart above indicates clearly that dramatic changes have taken place in the number of Chinese traveling abroad in the past fifteen years.

According to the figures given in the bar, we can see the number of Chinese traveling abroad was on a steady rise all the times. In 1995, the number of Chinese traveling abroad was about 2.5million, but within no more than ten years, the number of Chinese traveling abroad reached to 8 million Some driving factors that contribute to the above-mentioned changes may be summarized as fallows. First of all, with the rapid development of Chinese economy and society, the Chinese people are getting better off and can afford to travel abroad. Whats more, such huge changes have a lot to do with the development of the travel industry in China. More and more travel agencies are attracting more people to join in their tours abroad. Furthermore, the changes are closely related to our policy of opening up to the outside world. Taking all these factors into consideration, we may reasonably predict that with the rapid and further development of our society, there will be an increasing Chinese people who are going to go abroad for traveling. All this not only reflects not only the improvement of our living standards but also mirrors the development of our economy. (219 words) 100Test 下载频道开通，各类考试题目直接下载。详细请访问
