Private cars have been playing a vital part in our daily activities. On one hand, private cars provide the most convenient form of transportation. With a car, we can get around freely, without wasting a lot of time. On the other hand, the automobile industry provides jobs for countless workers. But, private cars, like anything else, have more than one face. With the increase of the number of private cars in China, they have given rise to a series of problems. They are responsible for a large proportion of air pollution, causing a lot of diseases to man, animals and plants. Traffic jams on busy roads delay us painfully every day. The consequences of all these are becoming even more serious. As far as I am concerned, I think we should find ways to reduce these disadvantages so as to solve the problems of heavy traffic and air pollution. Only in this way can our life become more exciting and comfortable. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
