来源：考试大 can money bring happiness can money bring happiness ? different people have different answers . some people take it for granted that money is the source of happiness . with money , one can buy whatever he likes , money can bring comfort , security , and so on . but a lot of people also hold that money is the root of all evil . this is interpreted to mean that if one is devoted to seeking money , he may go astray and make dirty money by foul means . money may also encourage weak-willed people to be addicted to such harmful habits as drug taking or gambling . 来源

：考试大 as to me , it is difficult not to admit that the above two reasons are a bit reasonable , but both views go to extremes . i think whether money can bring happiness depends on how one earns money and how he spends it . only when money is acquired by good means and spent for the benefit of not only oneself but also of society , can it bring happiness . directions: in this part, you are to write within 30 minutes a composition of no less than 150 words under the title of choosing a job. your composition should be based on the following outline given in chinese. please remember to write it clearly on the composition sheet. 参考作文1 来源：考试

大 choosing a job 1. 人们对择业的不同考虑 2. 我对择业的考虑 3. 我为什么这样考虑 when faced with the choice of jobs, different people have different considerations. some people will ask about the

salary of the job and benefit along with it first. others will consider the status of the job to be more important. still others are concerned with the location of the job, distance from home, transportation services or the working surroundings. 来源：考试大 as far as i am concerned, in deciding to accept or to turn down a job, interest in the job comes before anything else. of course, i need also to consider the salary or status of it, distance from home, transportation services and working surroundings, but such things do not play a decisive part in any final choice. 来源：考试大 the reason for such considerations are that i believe it is great pleasure to do what one enjoys doing and it would be a great pain to work on something one does not like. besides, it is interest and enthusiasm in the job that ensures success in it. a man successful in work will sooner or later be recognized by the society, which in turn makes his life more enjoyable. 参考作文2 part-time education in china 1. the popularity of part-time education in our time 2. the ever-growing importance of part-time education 3. my suggestions on the improvement of part-time education 来源：考试大 nowadays more and more people, even the aged grandmas and retired professors are engaged in part-time education. what accounts for the popularity of part-time education? i guess the reasons may be as follows. 来源：考试大 first of all, a modern man is involved in many more aspects of social life and wider knowledge sphere if he wants to be successful in life. the regular school training he has received may be far from enough for him. secondly, with the great increase of production and business efficiency, people can spare more time. thirdly, the working

institutions may ask their employees to renew their knowledge and skills constantly to meet challenges in their jobs. 来源：考试大

in spite of this, not enough people have come to know the importance of part-time education. so, here i would like to make two suggestions. one is to make continuous nation-wide efforts to strengthen our part-time education net, especially in the countryside and in poor and remote areas. the other is that the governments of all levels should pay equal attention to regular education and part-time education so that it can be a powerful means to heighten the cultural qualities of the entire chinese nation. 参考作文3

changes in our life
1. many changes in our life
2. the most important change
3. my attitudes toward the changes

来源：考试大

ever since china has opened up to the outside world, we have seen changes rushing into our life. skyscrapers spring up everywhere, foreign products like coca-cola pour into our market, farmers flood into cities, and computers are said to be revolutionizing our life. 来源：考试大

perhaps the most important change is the way we look at things around us. you do not have to be doing the same job all your life. advertising has become an inseparable part of our daily life. i think that we human beings as part of nature need changes in our life. no one can stop these since no one can hold back the urge for changes in ourselves, physically or mentally. the point is that we should learn how we can adjust and adapt ourselves to the ever-changing world.
