Education There is a growing tendency these days for more and more college students to take part-time jobs. Family education is one of most popular part-time jobs. Family education has some advantages. On one hand, Family education can let you earn some extra money and help you become more independent of your family. On the other hand, family education can offer you chances to contact with the society and the experience that you gain through family education can broaden your school life. However there are also some disadvantages in taking family education. For example, we may lose time needed for sleep, rest, study and recreation. Taking family education may interfere with our study and give us little or no useful experience. As a result, we may find it hard to adjust to what the college expects of him. As far as I am concerned, I think college students can take family education. But we have to strike a balance between school and the job. As a student, acquiring more knowledge is our first important task. Although family education can enrich our world of good, we should not spend too much time on it.

Private Cars With the development of China's economy, private cars become more and more popular in China. Private cars have been playing a vital part in our daily activities. On one hand, private cars provide the most convenient form of transportation. With a car, we can get around freely, without spending a lot of time. On the other

hand, the automobile industry provides jobs for countless workers strong support for other industries. In our world, private cars are indispensable. But with the increase of the number of private cars in China, they have given rise to a series of problems. They are responsible for a large proportion of air pollution, causing a lot of disease to man, animals and plants. Traffic accidents kill thousands of people every year and disable many more. Traffic jams on busy roads delay us painfully every day. The consequences of all these are becoming even more serious. Obviously, private cars, like anything else, have more than one face. As far as I am concerned, I think we should find ways to reduce these disadvantages so as to solve the problems of heavy traffic and air pollution. Only in this way, can our life become more exciting and comfortable.

The Development of Western China

As we all know, the Chinese government has already begun implementing some strategies to develop Western China, shifting the focus of economic construction from the eastern to western part of the country. Developing Western China is of great importance. It will bring Western China more chances to absorb foreign investments, technology, and even management experience, which are just what they greatly need. On the other hand, as Western China is a vast market, many eastern companies can cooperate with western companies and earn more money from it. Western China has been an undeveloped area for a long time because of its remoteness, poor education and inadequate infrastructure construction. Luckily, nowadays Western China develops very fast. The local governments have begun to accelerate the infrastructure construction.

Additionally, they have already paid much more attention to the investment of education and have drawn up talent cultivation programs. In my opinion, the Development of Western China is full of hope, chances, and challenges. As a university student of the 21st century, we should actively respond to the call of our country and devote ourselves to the development of western China. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
