Many students feel that such a home-stay program is a valuable part of their total learning experience. However, others may feel that such a plan offers little value. In a short essay, discuss one or two advantages of living with an American family and then state one or two disadvantages. Tell whether you are in favor of or opposed to the idea of home-stay. Give examples to support your opinion. My opinion about this subject is that it depends on your level of comprehension regarding conversational English. In other words, if you understand a considerable amount of English language (English), your best bet would be to choose living with an American family. But if your comprehension level is so low, in which a (that) basic communication is not possible, then (then it) would be wise to (for) you to choose living with people of your same country and/or language. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
