、 People attend college or university for many different reasons (for example, new experiences, career preparation, increased knowledge). Why do you think people attend college or university? Use specific reasons and examples to support your answer. [参考提纲] 1、同意上大学好. (1) 为未来工作进行准备 (2) 交更多的朋友，学习他们的思维方式 (3) 系统的学习知识【参考范文之一】 Why do people need to attend colleges or universities? Different people have different answers to this question. I believe that the three most common reasons are to prepare for a career, to have new experiences, and to increase their knowledge of themselves and the world around them. Career preparation is becoming more and more important to young people. For many, this is the primary reason to go to college. They know that the job market is competitive. At college, they can learn new skill for careers with a lot of opportunities. This means careers, such as information technology, that are expected to need a large workforce in the coming years. Also, students go to colleges and universities to have new experiences. This often means having the opportunity to meet people different from those in their hometowns. For most students, going to college is the first time theyve been away from home by themselves. In addition, this is the first time theyve had to make

decisions on their own. Making these decisions increases their knowledge of themselves. Besides looking for self-knowledge, people also attend a university or college to expand their knowledge in subjects they find interesting. For many, this will be their last chance for a long time to learn about something that doesn't relate to their career. I would recommend that people not be so focused on a career. They should go to college to have new experiences and learn about themselves and the world they live in. 【参考范文之二】

People study in college or university for many different reasons. I think the most important reason is to gain more knowledge and learn more skills. Of course, there are also many other reasons that people study in college such as to get more friends, and increase one's self-confidence. These days, most jobs require people who are educated and have good job skills. Therefore, the people who want a good job have to study hard and at least graduate with a high education. Furthermore, as technology advances all over the world, more and more education is required of people. Some people who study in college or university want to make more friends and increase their interpersonal skills. They enjoy their lives in university or college and tend to socialize a lot. They can meet more people who have the similar interests with themselves. They can go to uni ball after school and make more friends who they trust. The people who graduate from college seem more confident in our community. These people are more respected by society. Many people want to be respected and to be important by family, friends, their bosses, and others in their lives. They find that most of them can confidently talk

and do their jobs as they are more educated. Therefore, most people want to get the confidence through the university or college study. In today's society, people need more knowledge and skills to be adapted. The university and college study is a good way to achieve this. 【参考范文之三】 In China, more and more people try their best to attend college or university. What are the reasons that make people long for it? First of all, in my opinion, the most important reason is to gain competence to live a better life in the future. Competition of our days has become more and more drastic, and even a very simple job or low position will attract hundreds of candidates to apply for it. Only those who have a good education and general knowledge can gain better work. So, we should attend college or university for better competence. Second, attending college or university can change our life. For example, to myself, I am a student from countryside. I am one of the few people who can attend college or university. Most of those who have not studied in college or university go to work early in a small factory in a small town or on a farm in their hometown. Just because I have taken higher education, I can get better chances to study or work in the capital of our country where a lot of people want to go to. Why? Good education gives me chances to change my life. The third reason for attending a college is to increase knowledge. Study is a so interesting thing that it makes our life rich and colorful. It expands our eyesight by informing us with lots of new things what we cannot gain from our common life or experience. On the other hand, by attending college or university, you can learn the knowledge or skill necessary

for your future work. People attend college or university for various reasons. Some may attend for new experiences, and others may think about other things. What I have mentioned is just very few of them.
