Topic43：为什么有的人喜欢从事危险的体育活动？
Topic43 Why do you think some people are attracted to dangerous sports or other dangerous activities? Use specific reasons and examples to support your answer. [托福参看范文之一

] Topic: 43 Have you experienced the fear of bungee jumping? Have you ever enjoyed the excitement of car racing? Nowadays, more and more people are attracted to such dangerous activities, especially the young people. Wondering why? After thinking about the lifestyle of those people, the reason goes as follows. While the world is becoming more and more competitive, the task on each person's shoulder becomes heavier and heavier. People's activity everyday is very intense and they get more and more burdened after days of hard work. So everyone wants a release and the best way to relax and get relieved is to do the dangerous activities, because while you are doing something dangerous, you have to be concentrated on it, and you can't think about anything else. Hence you're relieved all the unhappiness and the troubles you had in daily work. In addition, to take risks and try out new things is one of human being's basic instincts. People always like to do something new, especially when something is popular as well. According to some statistics, the dangerous activities are becoming extremely popular among young people. If you don't try some dangerous activities, people will

think that you are a coward and afraid of doing it. So it ' s reasonable enough for them to do dangerous activities to show their braveness. However, I don ' t like dangerous activities and I believe the phenomenon that people are attracted to dangerous activities is just a whim. After realizing countless disadvantages of them, people will reconsider about them. Some safer activities to help people to get relieved will be developed afterwards. [托福参看范文之二

] Dangerous sports or activities attract a certain type of person. This person is often a risk taker, an optimist, and a fatalist. People who take risks are found both in dangerous sports and business. But it is a special person who takes a risk with his own life as opposed to his money. My father was a risk taker. He put everything he owned into his business, but he stopped playing risky sports like horseback riding and skiing. Once his business was a success and he no longer had to worry about providing for us, he returned, at the age of 60, to the risky sports that he did as a youth. Someone who plays dangerous sports must be an optimist. They cannot imagine that anything will happen to them. They never think about breaking their leg while skiing, falling off a cliff while rock climbing, fattening on their head while sky diving. They live for the thrill of the moment without a thought to the many things that could go wrong. Rock climbers and sports car drivers must be fatalist. They might plan for potential problems, but once they have done everything they can do, the outcome is out of their hands. A motorcyclist who jumps across a narrow canyon will get the fastest, strongest bike available that will carry him or her across the canyon. However, wind conditions or

other problems might interfere and the cyclist may fall short of his goal. Many people have the same traits of course. Many of us are risk takers, optimists, and fatalists. But I think people who play dangerous sports must have these characteristics in abundance. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
