Boys and girls should attend separate schools. Use specific reasons and examples to support your answer. [ 托福参看范文之一 ] Topic: 77Should boys and girls attend separate schools? This question is very arguable. Before rendering my opinion, let ' s consider the advantages for boys and girls to attend separate schools. Since boys and girls are different in many ways, they have different hobbies and the ways to learn new things. If they attend separate schools, the education can be more efficient because the school can teach them differently according to their personalities. But the disadvantages of it is greater. While boys and girls attend separate schools, there ' re few chances for them to communicate with opposite sexes, which will become a handicap for them to communicate with each other in their future. As far as I concerned, boys and girls should not attend separate schools. Among countless reason one can think of, the first and foremost reason is that people should have experience with opposite sex when they are in school, because in a society there ' re both males and females, people have to learn how to communicate with the opposite sex, which is a essential factor for people to succeed. Moreover, people have to learn from opposite sex. For example, while females should learn

braveness from males, males should learn carefulness from females. In addition, in a family, to learn from opposite sex becomes more important to keep the family harmonious. In addition, the knowledge of opposite sex is also important, without such knowledge, dealing with the relationships with opposite sex becomes extremely difficult especially after one ' s married. Finally, as we can see, it ' s definitely important for boys and girls to attend schools together, so that they can learn from each other, communicate with each other and they can know each other well, which is very valuable for their future.

Topic: 77

Nowadays, some may hold the opinion that boys and girls should attend separate schools, others have a negative attitude. As far as I am concerned, I agree that boys and girls should go to separate schools. My arguments for this point are listed as follows.

I agree with the statement since single-sex education provide a environment for boys and girls to concentrate on their study. Research shows that a single-sex school environment can eliminate the distraction from members of the opposite sex, and therefore is academically beneficial to students. Girls in an all-female school can establish self-esteem, and avoid the situation faced by young women in co-ed schools such as struggle to survive emotionally. They will be able to focus more on their academic curriculum, sometimes specifically designed, and prepare for their future education and career. The single-sex setting eliminates social distractions and allows for better concentration on academics. Another reason why I agree with the above statement is that traditional gender stereotypes are often reinforced in single-sex academies. Boys tended to be taught in

more regimented, traditional and individualistic fashion and girls in more nurturing, cooperative and open environments. This will develop their virtue and prepare them for their future roles in the society. Taking into account of all these factors, we may reach the conclusion that boys and girls should attend separate schools. Of course, there are also disadvantages of single-gender education, and simply separating boys and girls does not always improve the quality of education. A lot of efforts should be made to ensure that a single-gender education system be successful implemented. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
