Topic70：有人觉得汽车改善人们生活而有人觉得它产生很多社会问题，对此你是怎么看的？ Topic70

Some people think that the automobile has improved modern life.

Others think that the automobile has caused serious problems. What is your opinion? Use specific reasons and examples to support your answer..

[ 托福参看范文之一 ] Topic: 70I support the statement

that automobile has caused serious problems. While automobile has brought us many conveniences, it surely has brought us many

undesirable consequences, of which three can be singled out: traffic congestion, air pollution, and highway accidents. Automobiles have

congested City streets. The problem is more obvious when the masses of motor vehicles enter or leave cities at peak traffic hours.

The constantly growing number of automobiles throughout the world has made the congestion program worse and worse because

planners and engineer simply cannot find a solution to keep up with the increasing volume of the traffic growth. The widespread use of

automobiles for business travel has also led in many cities to a decline in public-transit systems, which result in more and more use of

private cars, and exacerbate the congestion problems. Air pollution is another program caused by the automobile. Automobile exhausts

commonly contribute half the atmospheric pollutants in large cities and even more in cities where atmospheric and topographic

conditions cause the smog formation. Although many cities require the installation of catalytic converters and other controls on motor vehicles to restrict the emission of pollutants, the concentration of many thousands of motor vehicles in large cities has given the problem a new dimension. Highway accidents create a distressing toll of fatalities and injuries wherever there is widespread use of automobiles. Each year there are hundreds of thousands of motor vehicle fatalities worldwide and about 50,000 in the United States alone. The social and economic costs of such accidents are enormous. Efforts to improve highway safety have been successful in most countries, but a reduction in the ratio of fatalities and injuries per distance traveled is often offset by increases in numbers of accidents because of the ever-growing use of motor vehicles. In short, automobile has brought us more bane than boon. We should take public transportation whenever possible, and reduce the number of cars running in urban streets. [ 托福参看范文之二 ] Although automobiles have improved our modern life in some way for its speed, convenience, and capacity of carrying things, we have had to pay the price for it. Now, as more and more automobiles have been putting into use, the problems that the automobile has caused are seemed to be more and more serious accordingly. These problems, in my mind, like the accidents, the air pollution, the damage of the ozone layers should be given more attention than anytime before. There are a lot of problems that has been causing by the automobile. It kills hundreds of thousands of people and disables many more every year. It drinks up our precious fossil fuels that

cannot be replaced. New roads for the automobile also eat up our precious farmlands while many children are starving all around the world. These problems are really serious and upsetting many of us. The most serious problem caused by the automobile is the air pollution. It is said that it emits millions of tons of harmful gas into the air everyday. The dirt air harms our human beings health badly. It can cause a variety of diseases such as plumbism, insomnia, mental disability and even certain kinds of cancer. That is really terrible. Air pollution caused by the automobile can give rise to even more serious consequences. One thing, it will destroy the ozone layers that protect the lives on the earth from the hurt of the strong and direct ultraviolet rays. Much more ultraviolet can also destroy the fragile ecosystem on the earth. It is just the life circle in which we survive. Another thing is that the air pollution caused by the automobile can lead to the global warming. If the weather is getting warmer and warmer, the icebergs scattered in both of the two poles of the earth will be melted, which will cause the sea level rising and flooding all the cities and villages along the seashores. The lost of the lives and property will be countless. That is really a tremendous disaster. I do not mean to deny the fact that the automobile has improved our modern life in many ways. It acts a vital role in our social life. It also supports our industries. It is indispensable in our modern life. We cannot imagine how we can live a modern life without the automobile. However, the problems it has caused today, such as the lives and properties lost, the dirty air and the consequences of the pollution, seems to be more dangerous and obvious than anytime.

Therefore, it will never over do to emphasize the seriousness of these problems and urge the governments and other responsible organizations to solve them [ 托福参看范文之三 ] Since the first automobile was introduced to our life, we can notice that there are a lot of changes happened around us. As a modern transportation, it not only brings convenience to our daily life, but also enhances the efficiency. One of advantages of using the automobile is that it can give the users much more convenience compared with other transportations, such as bike or bus. For me, I like to go to supermarket once per week and normal buy majority foods at one time. Can you imagine that I need to carry a lot of foodstuff and maybe take a crowded bus to reach home. How is it inconvenient! Suppose that I have a car, and then I will feel very relaxed because what I need to do is to put all my stuff at the back of the car. I can go back with nice music and happy mood of just shopping. On the other hand, the automobile can save our time and energy. Driving the automobile, we can go wherever we want or even further place. We can decide the destination and reach there faster than other transportations. Assuming that a train takes about two hours to reach Suzhou from Shanghai, but a car only needs about one hour. So we can use the balance one hour to do any other things or enjoy the views first. After all, time means a lot to modern people now. It can mean money to businessmen, knowledge to school students and profit to companies. By means of cutting time with the help of the automobile, we can increase the efficiency in a society. Of course, I must admit that in the meantime the automobile also brings out a lot

of problems such as traffic jam and air pollution. But these outcomes cannot be avoided during the development of a society. I believe we will have a better solution to solve all these problems. Generally speaking, I would like to say the automobile has improved modern life through providing more convenience to people and enhancing the efficiency. We should encourage society to support automobile industry and develop different kinds of automobiles to meet various customer needs. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
