And they must have known how difficult it is to write a children's book. Either the author has aimed too high, so that the children can't follow what is in his (or more often, her) story, or the story seems to be talking to the readers. The best children's books are neither very difficult nor very simple, and satisfy both the child who hears the story and the adult who reads it. Unfortunately, there are in fact too many books like this, and the problem of finding the right bedtime story is not so easy to solve. This may be why many of the books regarded as classics of children's literature were in fact written for adults. "Alice's Adventure in Wonderland" is perhaps the most famous of these. Children, left to themselves, often show the worst possible interest in literature. Just leave a child in a bookshop or library and he will willingly choose the books written in an imaginative way, or have a look at most children's comics, full of the stories and jokes which are the favorites of teachers and right-thinking parents. Perhaps we parents should stop trying to brainwash children into our taste in literature. After all, children and adults are so different that we parents should not expect that they will enjoy the same books. So I suppose we'll just have to compromise over that bedtime story. 1.
