which is more important? When asked about their opinion of career and family, people always respond differently. Some people deem it more important to pursue their career, while there are always other people who argue that family should be the number one in one ' s life.来源：www.examda.com It goes without any question that career plays a key role in our life. In the very first place, career can give us an aim to live on. Without career, much of our living time will be certainly wasted. What ' s more, career can provide us with a means to live on. Most of the people earn their income from a job. On the other hand, family is also an indispensable part of life, as many people will admit. Family is always regarded as a place where we can escape from troubles in life. In addition, we can obtain a sense of belonging to from family. Without it, anyone will feel lonely and desperate. In my opinion, career and family are not in opposition to each other. Rather, they can enhance each other so that one ' s life can become better and better. Therefore, it ' s not a choice between right and wrong, but one between ideal and practical.来源

the right to host 2008 Olympic games. As a resident in Beijing, I feel quite excited and like to share with you my happiness. This success means a lot more than a game to me. In the first place, this Games will definitely promote the development of our economy. According to a recent survey by some experts, this games will raise our GDP by about 3%, and offer about 10,000 jobs. What ' s more, our culture will be widely recognized and accepted all over the world through the Games. People will come over from every corner of the world, and experience Chinese culture in every aspect. Besides, through the games, our living environment will be greatly improved. For example, the public transportation system will be up-dated. Moreover, it ' s known that more trees will be planted, and grassland will be considerably expanded. My friend, I really look forward to the coming of this great Games. As an individual, I ' m all ready to offer my help in any way I can. I also hope to invite you all to come here, and watch the games in 2008. Sincerely yours,

3. Tourism in China

Recent years have seen a tendency in China that tourism is growing faster. According to a recent survey made by some experts, about 47% urban residents travel regularly, and 28% rural residents also make their tour across the country. The survey also shows that more people are interested in tourism, and will join the army in the future. Facing this tendency, we can ' t help exploring some underlying factors that are responsible. In the very first place, with the policy of reform and opening up, Chinese people ' s living standard has been greatly improved, and therefore, most of them can afford to travel around. What ' s more, it is believed that people now

take a more positive attitude to tourism, and regard it as a life style. In addition, tourism facilities are becoming better and better. For example, transportation develops fast, and many scenic spots are available now. Though there are still some problems with tourism, I personally believe that tourism should be playing a key role in our life. I also hope that our government will make policies to create a better environment for tourists. 来源 : www.examda.com

4. Income Gap There has been a heated discussion over the growing income gap now. Some people hold that the gap is natural because it reflects different contributions that different people make in their work.. In their view, those people with high income work hard and long. Besides, these people bring high efficiency, and create more wealth. Accordingly, they deserve high pay. On the other hand, there are always some people who view this gap negatively. They believe that a lot of crimes happen as a result of this income gap. Some people make so little from their work that they risk taking criminal acts to get rich. In fact, experts have long found out that most cases of crime are directly related to low income. There is another point to back up a negative view against income gap. For most people, income gap may destroy the satisfaction that they obtain from work. As anything has two sides, so has the problem of income gap. Personally, I believe that this gap may motivate people to compete better in job market. When this gap is growing too wide, however, our government should make some policies to get rid of its negative consequences.

5. Knowledge is power As a popular saying goes, knowledge is power. With our country developing fast, the importance of knowledge is

becoming more and more obvious to us all. 来源

: www.examda.com In the very first place, with knowledge, one can easily find jobs. It is often said that we are entering a new age of information, and knowledge plays a key role in this age. For example, if one wants to work in IT field, one needs to improve his knowledge constantly. What ' s more, knowledgeable people can get quick promotion in their work. As is often the case, a person in charge of an organization is the one who has most knowledge. In addition, more knowledge is also needed to make our life rich and fulfilled. Accordingly, we must try hard to acquire as much knowledge as we can. Luckily, a lot of means may enable us to do so. Among other things, web proves the best and fastest way to get information.

6. Saving animals

There is an undeniable fact that the number of animals is declining faster than ever before. According to a recent survey made by some experts, about 37 species disappear from our earth every year. It is obvious that the problem has become a serious one worth our concern. When we explore this problem, some underlying factors emerge. In the very first place, human beings have played a big part. With the fast development of human society, the environment is much destroyed, and animals lose their home. Accordingly, some species become extinct. What ' s more, people hunt animals for food and skin. A good case in point is that the Japanese have killed a lot of whales because they like to eat the meat. In addition, human beings are largely responsible for the pollution of natural environment, and poison animals in many ways.

来源 : www.examda.com The current problem, I believe, should be

solved immediately. First of all, our government should play a key role in making relevant rules and protecting animals. The general public should also be educated to value the existence of these animals on our planet. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
