Directions: for this part, you are allowed 30 minutes to write a composition based on the graph below. Outline: 1. Rise and fall of the rate of car accident as indicated by the graph. 2. Possible reason (s) for the decline of car accidents in the city. 3. Your predictions of what will happen this year.

Food	Year	1986	1987	1988	1989	1990
Grain		49%	47%	46.5%	45%	45%
Milk		10%	11%	11%	12%	13%
Meat		17%	20%	22.5%	23%	21%
Fruit and vegetables		24%	22%	20%	20%	21%
Total		100%	100%	100%	100%	100%

Your composition should be no less than 120 words and you should quote as few figures as possible. 范文：The graph shows the changing rate of car accidents in Walton city in 1990. The first two months of 1990 showed an increasing trend. The rate rose to 32 in March but fell to 26 in June. From June on the rate was rising again and reached the peak point 39 in August. After August the rate began to decline, and eventually dropped to the lowest point 16 at the end of the year. The highest rate in August was due to unfavorable weather conditions. Humidity and high temperature make drivers impatient, which easily leads to car accidents. The high rate in the first half of 1990 was also caused by the bad weather condition. In Walton City the excessive rain comes at early spring. The rain made road slippery, which often resulted in car accidents. This year the pattern is expected to change. The city government has raised fund to improve the road condition. Two

new roads will be finished at the beginning of this year and are expected to open to traffic soon. Furthermore, the new road regulation provides that in summer every car must be air-conditioned. With all these precautions, I'm sure that the rate of car accidents will be much lower this year. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
