"At the small, nonprofit hospital in the town of Saluda, the average length of a patient's stay is two days. at the large, for-profit hospital in the nearby city of Megaville, the average patient stay is six days. Also, the cure rate among patients in the Saluda hospital is about twice that of the Megaville hospital. The Saluda hospital has more employees per patient than the hospital in Megaville, and there are few complaints about service at the local hospital. Such data indicate that treatment in smaller, nonprofit hospitals is more economical and of better quality than treatment in larger, for-profit hospitals." 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
