Passage 1 One phase of the business cycle is the expansion phase. This phase is a two-fold one, including recovery and prosperity. During the recovery period there is ever - growing expansion of existing facilities and new facilities for production are created. More businesses are created and older ones expanded. Improvements of various kinds are made. There is an ever increasing optimism (乐观主义) about the future of economic growth. Much capital is invested in machinery or "heavy" industry. More labor is employed. More raw materials are required. As one part of the economy develops, other parts are affected. For example, a great expansion in automobiles results in an expansion of the steel, glass, and industries. Roads are required. Thus the cement and machinery industries are stimulated. Demand for labor and materials results in greater prosperity for workers and suppliers (供应商) of raw materials, including farmers. This increases purchasing power and the volume of goods bought and sold. Thus prosperity is diffused (扩散) among the various portions of the population. This prosperity period may continue to rise and rise without an apparent end. However a time comes when this phase reaches a peak and stop spiraling (盘旋地移动) upwards. This is the end of the expansion phase. 21. We may assume that in the next paragraph the writer will discuss _____.
