“Cool” is a word with many meanings. Its traditional meaning is used to describe a temperature that is fairly cold. As the world has changed, however, the word has expanded to have many different meanings. “Cool” can be used to express feelings of surprise in almost anything. When you see a brand-name car in the street, maybe you can't help exclaim, “It's cool.” You might think, “He's so cool,” when you see your favorite footballer. We all enlarge the meaning of “cool”. You can use it to describe many words such as “new” or “amazing.” Here's an interesting story we can see illustrate the usage of the word: A teacher asked her students to describe the waterfall they had visited. On one student's paper was just the one word, “It's so cool.” The story also proves the shortage of words and expressions. “Cool,” some people have no words to express the same meaning. So it is important to improve our word strength to maintain some special words. As a popular word, “cool” stands for a kind of special feeling that people can accept easily. Excepting “cool,” can you think of many words that make your life as colorful? I can. And I think they are also very important.
