享ISSUE: Recently there is a debate over whether.....Some people assert that..., while other people believe that...As a matter of fact, the issue of whether..... is a complex and controversial one. Different people hold different views due to their distinct backgrounds. Therefore, there is not a universal answer to this question, and whether one choice takes precedence over the other may quite depend on the specific situation. The decision, nevertheless, is not an easy one to make. Actually, the final judgment should rely on a case-by-case analysis. As far as I am concerned, however, I agree that ....., and do not agree that..... My view can be greatly substantiated by the following discussions. The first argument that can be presented to develop my position is that...A good example may be found in the case that...Under this circumstance, it is obvious that .... In addition, there is another reason for me to choose this statement. The reason is not far to seek.... To illustrate, let us consider that...Hence, another equally important aspect is that.... Admittedly, it may be true that.... in some conditions. However, this alone does not constitute a sufficient support to claim that .....,Actually, these cases are rare and therefore are too specific and too weak to strengthen the view that...When the advantages and

disadvantages of x and y are carefully examined, the most striking conclusion is obvious that... To sum up, due to the above mentioned reasons, which sometimes correlate with each other to generate an integrate whole and thus become more convincing than any single one of them, we may be comfortable to say that...., because....

**ARGUMENT** In this argument, the author concludes that... To support his conclusion, the author points out that.... In addition, the author reasons that... Further more, he also assumes that.... At first glance, the author ' s argument appears to be somehow appealing, while a close examination will reveal how groundless it is. We do not have to look very far to see the invalidity of this argument. This argument is problematic for the following reasons. In the first place, this argument rests on a gratuitous assumption that.... The author unfairly assumes that.... However, the assumption is questionable because the author provides no evidence to support this argument. The arguer fails to takesintosaccount other facts that might contribute to the result that..... It is likely that ,..... it is also likely that.....Any of these scenarios, if true, would show that..... (72) Therefore, this argument is unwarranted without ruling out such possibility. In the second place, the argument commits a logic fallacy of “ after this and therefore because of this ” . In no case can the mere fact that...be cited as evidence to support the assumption that there is a causal-effect relationship between A and B. Moreover, that just because B can be statistically correlated with A does not necessarily mean that A is the cause of B. In fact, the author has obviously

neglected the possibility of other alternative facts such as..., or... may contribute to a certain extent to B. It may be only a coincidence that ..... Unless the author can rule out other factors relevant to..., this assumption in question can not be accepted. 100Test 下载频道开通, 各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
