your country? Use reasons and specific examples to support your answer. ” 答 : It is very lucky for me to introduce the music of our motherland, china, to the friends who come from different parts of the world. The topic about the relationships between the music and our culture is so large for me to reveal its deep and gorgeous personality in such a short essay , for that our motherland has such a long history , has so many different areas, and so many people. And different area has different style of music in different stage of her history. But in our heart, one point is certain: we have a common motherland: China. In different stage of this ancient civilized country, she conceives different musics, and these musics correspond to different cultures. Among all of these musics, what I would like to introduce to you is the classical music which is performed by zheng, a Chinese zither with 25 strings , because in the ancient time , the great thinker Confucius said music is used to teach people of the country. And he supported that music which is on the same way of nature fits everyone in every different stage of history. It traverses history and transcends boundaries between different countries . Zheng, for example, if you have opportunity to listen to its music, you may hear nature. You may feel that you are talking to nature. You can hear the blossoming of flowers, the flowing of rivulet, the rolling of tides to deep sea . You can see the working of honest people and the love of nature that comes from your deep heart. Listen hard, then you see the great heroes living in history. the splendor of this globe. the smiles of the beauties.... then you appreciate the grandness of the deep culture of this ancient country. This is the verve of these 25 strings : simple, plain, ordinary

,but its charm is vast,deep,gorgeous,and distant.It is possible that every people who has once felt it would never forget it as you never forget the beauty of nature and the personality of yourself.The charm of the music ,just as you listen to it.When you feel it,you can touch the heart of its deep culture.I dont know if I could change the topic a little"Music tells us much about a culture".To learn its culture,you had better listen to its music first. 100Test 下载频道开通 , 各类考试题目直接下载。详细请访问 www.100test.com
