PERFORMANCE IN 19991999年度经济成就 GDP Chinas GDP grew slightly more than 7 percent in 1999, thanks only to the governments ongoing stimulus program. With other Asian countries recovering, Chinas probable WTO accession this year, and a new drive to boost the private sector, however, both the Chinese government and outside analysts predict slightly stronger growth-around 7.5 percent-in 2000. Investment Investment in fixed assets rose 7.8 percent in 1999, and is expected to increase by another 7.8 percent in 2000. Much of the investment came from the governments stimulus plan. Prices Consumer and retail prices fell throughout 1999. Overcapacity in many industries was chiefly responsible for the 27-month deflation, but slack demand caused by consumer worry about job security and education and health costs also played a role. Many economists believe that the worst is past, and that deflation will wane in 2000. Notesperformance n.something performed. an accomplishment完成的事 ; 成就GDP:gross domestic product国内生产总值thanks (to) n.
