题1. Equipped with computers, managers today operate their firms with higher efficiency and less cost than they used to be. operate a firm 经营 > run a firm efficiency 高效 efficient 高效的 A. Right B. Wrong C. Not mentioned 答案：A Before the widespread use of computers, managers could not make full use of large amounts of valuable information about a companys activities. The information either reached managers too late or was too expensive to be used. Today, managers are facing a wide range of data processing and information instruments. spread 扩散 widespread 推广 make full use of 完全使用、充分利用 问题2. Today, conventional financial controls are still exercised in some minor areas such as billing and vocational training. conventional 保守的，传统的 exercised=used=operated minor 次要 major 主要的 bill 账单 in place of =take place of =replace 代替 A. Right B. Wrong C. Not mentioned 答案：B In place of a few financial controls, managers can draw on computer-based information systems to control activities in every area of their company. On any kinds of performance measures, the information provided by these systems helps managers compare standards with actual results, find out problems, and take corrective action before it is too late to make changes. 问题3. It is unnecessary for a neighborhood baker to use a computer in his shop. necessary 必要的 unnecessary 没必要的 baker

面包师 neighbourhood shopkeeper A.Right B.Wrong C.Not mentioned 答案 : B The introduction of computerized information systems has sharply changed management control in many companies. Even a neighborhood shopkeeper may now use computer to control sales, billing, and other activities. In large companies, electronic data processing systems monitor entire projects and sets of operations. 4.At present about 10% of American citizens possess a microcomputer. At present=now 10%:one for ten=every ten=one out of ten ten percent=one tenth three tenths 十分之三 10%=0.1 point one A.Right B.Wrong C.Not mentioned 答案 : A Now, there are about 24 million microcomputers in use in the United States one for every 10 citizens. possess=have=own 问题5.One thing that managers do not have to understand is how computer work. A.Right B.Wrong C.Not mentioned 答案 : B It is estimated that by 1996, 61 percent of American managers will be using some sort of electronic work station. In order for managers to be sure that the computer-based information they are receiving is accurate, they need to understand how computers work. 问题6.In some cases managers have to learn how to write programs so as to work out computerized information systems that suit their own companies best. so as to=so that=in order that A.Right B.Wrong C.Not mentioned 答案 : C However, in most cases they do not need to learn how to program computers. Rather, managers should understand how computerized information systems work ; how they are developed ; their limitations and costs ; and the manner in which information systems may be used. Such an understanding is

not difficult to achieve. 问题7. Computerized firms would rather employ business graduates than computer science graduates because it is easier to train the former into qualified employees. would rather A than B 宁做A也不做B prefer A to B 宁愿 A也不B train 培训 former 前者 latter 后者 be qualified for 称职 qualify for v. quality 质量 n. A. Right B. Wrong C. Not mentioned 答案 : A One research found that business firms were more successful in teaching basic information about computers to business graduates than they were in teaching business subjects to computer science graduates. 100Test 下载频道开通 , 各类考试题目直接下载。详细请访问 www.100test.com
