But some people insist that through evolution human beings came from apes. A recent incident seems to support such a suggestion. A three-year-old boy fell from a height of 18 feet into an area where gorillas were kept in a zoo. On seeing this, a 150-pound gorilla came to his rescue. To everyones astonishment, it picked up the boy, cradled him in its arms and brought him to the zookeepers. While zoogoers screamed in horror, the gorilla showed maternal behavior and even protected the child from other gorillas. The boy survived and the gorilla was given an award. This incident had many people asking, "Could it be that humans do have a special bond with apes?" Whatever the answer may be, theres no denying the resemblance between men and monkeys. 100Test 下载频道开通, 各类考试题目直接下载。详细请访问 www.100test.com
