Have you ever had an operation ? If you have , you ' ll know that surgical scars can leave you with a burning pain for months and sometimes even years. Frankly speaking , the pain is sometimes so unbearable it ' s hard to even stand the weight of your own clothes on the scars. Generally speaking , most ordinary painkillers won ' t work. Besides , they are so powerful that they may cause side effects. Fortunately , according to a recent study , doctors say there is a red-hot cure : chili peppers. An ointment is made from the ingredient that makes chili peppers hot. It kind of short-circuits the pain. The ointment is sold in a tube that lasts a month and costs only US\$16. It ' s considered the newest , most creative and inexpensive way of dealing with the problem. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
