S : I hear that scientists are planning to study asteroids and meteors , right ? T : Yes. They want to determine whether Earth is in danger of being struck by such a rock. S : What if they discover that a big one is coming straight for us ? T : In that case , there are two things they can do. They can launch rockets to push the rock off its course. S : So that it will miss Earth , right ? T : Right. And if that fails , we can try destroying the rock with nuclear missiles. S : Wow ! I never thought that nuclear weapons could save the world instead of ending it ! 100Test 下载频道开通 , 各类考试题目直接下载。详细请访问 www.100test.com
