Money Fashion never ceases to surprise me. Recently , a fashion designer came up with another strange creation. His idea comes straight from the garbage dump , so to speak. He makes sweaters

from used plastic bottles. What a weird sweater thats going to be !

This new kind of sweater will protect you from the rain and cold.

They will , therefore , be especially attractive to outdoor people such as fishermen , hunters and mountain climbers. However ,

theyre not cheap. They sell at prices ranging from US\$100 to

US\$150. What a great idea for making money ! Dont you think ?
