

一个ACCESS数据库数据传递的方法 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/135/2021_2022__E4_B8_80_E4_B8_AAACCE_c97_135734.htm 一直以来，ACCESS数据库中的申报数据在分公司与总公司之间传递，用EXCEL或DBASE、TXT甚至ACCESS等格式，我总觉得不太理想。最近看了一本书，不经意间发现了一个方法，使用ACCESS数据库生成申报数据与读入数据似乎简单了不少，特拿出来与大家分享。同时，也希望能得到更多的指点。附上示例：

```
Sub Mwrite()  
On Error GoTo thiserr Dim rs As New ADODB.Recordset rs.Open  
amp.quot., CurrentProject.Connection, adOpenDynamic,  
adLockOptimistic, acTable rs.Save amp.quot., adPersistADTG  
rs.Close Set rs = Nothing thisexit: Exit Sub thiserr: MsgBox  
Err.Description Resume thisexit End Sub  
Sub Mread() On Error  
GoTo Merr Dim i As Integer Dim rsDe As New ADODB.Recordset  
Dim rsSo As New ADODB.Recordset rsSo.Open amp.quot.,  
amp.quot. rsDe.Open amp.quot., CurrentProject.Connection,  
adOpenKeyset, adLockOptimistic, acTable Do Until rsSo.EOF  
rsDe.AddNew For i = 0 To rsSo.Fields.Count - 1 rsDe.Fields(i) =  
rsSo.Fields(rsDe.Fields(i).Name) Next i rsDe.Update  
rsSo.MoveNext Loop rsSo.Close rsDe.Close Set rsSo = Nothing Set  
rsDe = Nothing Mexit: Exit Sub Merr: MsgBox Err.Description  
Resume Mexit End Sub
```
