```
Explicit Public Const GWL_WNDPROC = (-4) Public Const WM_NCHITTEST = &H84 Public Const HTCLIENT = 1 Public Const HTCAPTION = 2 Declare Function CallWindowProc Lib "user32" Alias "CallWindowProcA" (ByVal lpPrevWndFunc As Long, ByVal hWnd As Long, ByVal Msg As Long, ByVal wParam As Long, ByVal lParam As Long) As Long Declare Function
```

```
GetWindowLong Lib "user32" Alias "GetWindowLongA" (ByVal hWnd As Long, ByVal nIndex As Long) As Long Declare Function
```

```
SetWindowLong Lib "user32" Alias "SetWindowLongA" (ByVal hWnd As Long, ByVal nIndex As Long, ByVal dwNewLong As Long) As Long Public prevWndProc As Long Function
```

```
WndProc(ByVal hWnd As Long, ByVal Msg As Long, ByVal wParam As Long, ByVal lParam As Long) As Long WndProc = CallWindowProc(prevWndProc, hWnd, Msg, wParam, lParam) If
```

```
Msg = WM_NCHITTEST And WndProc = HTCLIENT Then WndProc = HTCAPTION End If End Function
```

程序首先调用CallWindowProc,这样就可以从还回值的知当前的鼠标位置位于那一个区域,接着判断返回值是否等于HTCLIENT(工作区内),如果是,则将返回值设置成HTCAPTION(标题区),这样就可以瞒过Windows,让Windows以为鼠标位于标题区内

```
Form1 Option Explicit Private Sub Command1_Click() Unload Me End Sub Private Sub Form_Load() prevWndProc =
```

```
GetWindowLong(Me.hWnd, GWL_WNDPROC)
SetWindowLong Me.hWnd, GWL_WNDPROC, AddressOf
WndProc End Sub Private Sub Form_Unload(Cancel As Integer)
SetWindowLong Me.hWnd, GWL_WNDPROC, prevWndProc
End Sub 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
