You are implementing a Windows 2000 network consisting of five sites in the blueskyairlines.com domain. There are 15,000 users in Chicago, 5,000 users in LOS Angeles, 2,000 users in Miami, 10,000 users in New York, and 2,000 users in Seattle. You are designing the structure of the DNS servers. You want to allow secure dynamic updates to DNS in Chicago, LOS Angeles, And NEW York, You want full DNS replication to occur in all the sites. You do not want the Miami Site to have an editable copy of the DNS zone. How should you configure the DNS servers to accomplish these goals? To answer, Click the Select and Place button, and then drag the letter indicating the appropriate server type to each site. Next drag the number indicating the appropriate zone type to each site. Two sites have been partially completed for you. (Notes. Zone types and server types can be used more than once.) 2. Your company ' s network consists of two windows 2000 domains: contoso.com and newyork.contoso.com. The newyork.contoso.com domain contains three organizational units (OUs): Sales, Marketing, and Finance. You are a member of the Domain Admins group in newyork.contoso.com. An employee named Maria can reset passwords for the Finance OU. Maria will be moving to the Sales OU and no longer needs access to the Finance OU. A. In the Delegation

of Control wizard. Specify that Maria cannot reset passwords for the domain controller to which Maria ' s user account authenticates. B. Clear the Trust computer for delegation check box in the properties for the domain controller to which Maria ' s user account authenticates. C. In the security properties of the Finance OU, remove Maria ' s right to reset passwords. D. Copy Maria ' s user account to sales OU.and then 0delete the account. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
