you are the domain administrator for your companys windows 2000 active directory network and you want to manage a different domain.you open the active directory users and computers and in the console tree,right-click the active directory users and computers node,and then click\_\_\_\_\_a.connect asb.openc.connect to domaind.connect to domain controllere.connect to server0select the

1 best answer 作为一名windows 2000活动目录的域管理员，你想要管理不同的域，你打开活动目录用户和计算机控制台树，右键单击活动目录用户和计算机节点，然后你需要如何操作呢？

解答：这是一道非常明显的考查操作的题目，想要管理不同的域，在控制台树中的相关节点右键单击，然后选择连接到域就可以了。正确答案：

cto manage a different domainopen active directory users and computers in the console tree, right-click the active directory users and computers node, and then click connect to domain. type the domain name.or, click browse, and then 0select the domain from the list.notesto open active directory users and computers, click start, point to programs, point to administrative tools, and then click active directory users and computers. you must have the correct permissions to manage the domain you 0select. use run as to use active directory administrative tools with appropriate permissions. for more information, see related topics. 100Test 下载频道开通，各类考试题目直接下载。详细
