问题：if they were needed because the cd-rom drive is not bootable,how would you create the bootable floppy disks for a windows 2000 installation?

a.download the makeboot.exe program from the microsoft website.

b.winnt /ox can be used to create setup boot disks from the

command line. c.winnt /ox and winnt32 /ox can both used to create setup boot disks from the command line. d.run the makeboot.exe

program. 0select the 1 best answer(选择一个最佳答案)

假设cd-rom不能够启动，需要怎样为windows 2000的安装创建一个启动盘？解答：要创建安装盘，需要从另一台正在运行windows 2000的计算机上运行makeboot.exe程序

。makeboot.exe位于windows 2000组件磁盘的bootdisk文件夹下

。要创建一个安装盘，点击"开始""运行"，然后在打开的对话框中输入makeboot a:，然后点击"确定"。

windows xp professional安装启动盘只能够从microsoft站点下载。
