(ADDRESS=(PROTOCOL=tcp)(HOST=192.168.1.123)(PORT=5
8147))这是和网络连接相关的一个错误, Metalink上给出了如下
的解决方案: 1. set INBOUND_CONNECT_TIMEOUT_ = 0 in
listener.ora 2. set SQLNET.INBOUND_CONNECT_TIMEOUT =
0 in sqlnet.ora of server. 3. stop and start both listener and database. 4.
Now try to connect to DB and observe the behaviour 这里重起数据

库和Listener我认为是没有必要的,我们reload一下Listner应该就可以了.[oracle@order admin]\$ lsnrctl LSNRCTL for Linux:
