

java小程序中鼠标事件的响应处理（包含右键、双击等）PDF
转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/144/2021_2022_java_E5_B0_8F_E7_A8_8B_c104_144505.htm javaduke 原创于

www.dukejava.com 主页上提供大量java编程技巧如何在小程序
中实现鼠标响应？

```
public class Hello extends Applet implements  
MouseListener{public void init(){addMouseListener(this);}public  
void mouseEntered(MouseEvent  
e){au.play().setBackground(Color.blue);}public void  
mouseExited(MouseEvent e){setBackground(Color.black);}public  
void mousePressed(MouseEvent e){}public void  
mouseReleased(MouseEvent e){}public void  
mouseClicked(MouseEvent e){}}
```

首先在小程序中实现事件监听
器，再实现鼠标用户接口如何小程序中处理鼠标双、三击？

```
component.addMouseListener(new MyMouseListener()).public  
class MyMouseListener extends MouseAdapter {public void  
mouseClicked(MouseEvent evt) {if (evt.getClickCount() == 3) {//  
处理鼠标三击} else if (evt.getClickCount() == 2) {// 处理鼠标双  
击}}}
```
