https://www.100test.com/kao_ti2020/145/2021_2022__E5_9F_BA_E7_A1_80_E7_9F_A5_E8_c104_145054.htm 1.单用一个JSP文件
测试SYBASE jdbc-5_2 JDBC数据库接口：JSP测试SYBASE
jdbc-5_2 JDBC数据库接口 JSP测试SYBASE jdbc-5_2
JDBC数据库接

```
□Class.forName("com.sybase.jdbc2.jdbc.SybDriver").String url  
="jdbc:sybase:Tds:localhost:2638". Connection conn=  
DriverManager.getConnection(url, "dba", "sql"). Statement  
stmt=conn.createStatement(). String sql="0select  
emp_lname,dept_id,street,city,state from employee order by  
emp_lname". ResultSet rs=stmt.executeQuery(sql). while(rs.next())  
{out.print(" " rs.getString("emp_lname") " ").out.print(" "  
rs.getString("dept_id") " ").out.print(" " rs.getString("street")  
").out.print(" " rs.getString("city") " ").out.print(" "  
rs.getString("state") " ").}%> rs.close(). stmt.close(). conn.close().
```

```
%> 2.再用JSP和Java Bean的方法: JSP Code: ResultSet  
rs=sybase.Query("0select * from tjck_dh"). while(rs.next())  
{out.print("|" rs.getString("name")  
"|").out.print(rs.getString("card_no")  
"|").out.print(rs.getString("amount")  
"|").out.print(rs.getString("home_call")  
"|").out.print(rs.getString("office_call") "|").}rs.close(). %> 100Test
```
