These classes have the following inheritance relation as shown below:  
Person|-----| Student  
Teacher  
There is the following expression in a Java source file:  
Person p = new Teacher(). Which of the following expressions return true?  
A. p instanceof Teacher  
B. p instanceof Student  
C. p instanceof Person  
D. None of them returns true  
Explanation: The instanceof operator is used to test the type of an object. Because the reference p refers to a Teacher object and the Teacher is a subclass of the Person class the expressions in answer A and C will return true.  
Correct Answer: A,C
