A. public class test {public int x = 0. public test(int x) {this.x = x.}} B. public class Test {public int x=0. public Test(int x) {this.x = x.}} C. public class Test extends T1, T2 {public int x = 0. public Test (int x) {this.x = x.}} D. public class Test extends T1 {public int x=0. public Test(int x){this.x = x.}} E. protected class Test extends T2 {public int x=0. public Test(int x){this.x=x.}} Explanation: In the Test.java source file the class name should be Test, not test, for it is case-sensitive in Java. One class should have not more than one superclass. The protected modifier can not be put in front of the class. Correct Answer: B,D 35 of 60 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
