```
class base { public void base() { system.out.println("base"); } } public class in extends base { public static void main(string argv[]) { in i = new in(); } }
```

 1) compile time error base is a keyword 2) compilation and no output at runtime 3) output of base 4) runtime error base has no valid constructor question 12) you have a public class called myclass with the main method defined as follows

```
public static void main(string parm[]) { system.out.println(parm[0]); }
```

 if you attempt to compile the class and run the program as follows

```
java myclass hello
```

 what will happen? 1) compile time error, main is not correctly defined 2) runtime error, main is not correctly defined 3) compilation and output of java 4) compilation and output of hello question 13) which of the following statements are true? 1) if a class has any abstract methods it must be declared abstract itself. 2) all methods in an abstract class must be declared as abstract 3) when applied to a class, the final modifier means it cannot be sub-classed 4) transient and volatile are java modifiers 100Test 下载频道开通, 各类考试题目直接下载。详细请访问 www.100test.com
