```
public class agg {
    static public long i = 10;
    public static void main (String argv[]) {
        switch (i) {
            default: system.out.println("no value given");
            case 1: system.out.println("one");
            case 10: system.out.println("ten");
            case 5: system.out.println("five");
        }
    }
}
```

1) compile time error 2) output of "ten" followed by "five" 3) output of "ten" 4) compilation and run time error because of location of default
question 56) given the following class

```
public class zeroPrint {
    public static void main (String argv[]) {
        int i = 0; //here
    }
}
```

which of the following lines if placed after the comment //here will print out 0.
1) `system.out.println(i);` 2) `system.out.println(i 0);` 3) `system.out.println(i);` 4) `system.out.println(i--);`
