One of the difficulties of dealing with the United States is that the old non-metric measurements are still used in some industries. Here are some common abbreviations printed in bold type. What do they stand for ?

- 1 h.p.=746 watts
- 1 U.S.gall.=3.785 litres[but 1 British (imperial) gall.=4.456 litres]
- 1 yd.=0.9144 metres
- 1 yd.=3 ft.
- 1 in.=2.54 centimetres
- 1 oz.=28.35 grams
- 1 cwt.=45.359 kilograms
- 2.205 lbs=1 kilogram
- and , though not really a measurement , 1 doz. boxes=12 boxes

1. horsepower 2. gallon 3. yard 4. feet 5. inch 6. ounce 7. hundredweight 8. pounds 9. dozen
