The report sums up the development of the global and Chinese wool textile markets in 2004. Through accurate data and full elaboration, it describes the structure of China ' s wool textile market and features of the demand-supply relationship from various angles. Meanwhile, it examines competition between enterprises in different market segments, presenting assessment of leading players ' competitiveness. The report especially points out the following: With the recovery of the world economy and wool textile garments regaining popularity, the European and American wool textile markets gradually recovered in 2004. In the first half of the year, China ' s wool textile industry continued to maintain a good growth momentum, witnessing big year-on-year rises in production and sales and notable improvement in operational quality. On the whole, the industry was a market of perfect competition. But there was a very high degree of concentration in some production departments like worsted woolen piece goods. It is forecast that with the abolition of the world textile quota system, Chinese wool textile enterprises will increase their investment and expand their production. For a certain period of time, there will be not much change to a market structure of high competition. Integration between the upstream and

downstream industries will become a new development trend of China ' s wool textile industry. Chinese wool textile enterprises should greatly improve the quality of wool, pay attention to brand and intellectual property protection, and seize the opportunities that come with the lifting of world textile quotas in 2005 to accelerate their growth. After analyzing major factors affecting the development of China ' s wool textile market from 2005-2009, the report presents qualitative and quantitative forecast of the development trend of the market. Finally, it provides development strategy and recommendations for leading enterprises and growing enterprises respectively. 来源 : www.examda.com
