University, Charles Townes worked with all of the following

EXCEPT (A) stimulated emission (B) microwaves (C) light

amplification (D) a maser 7. In approximately what year was the first

maser built? (A) 1917 (B) 1951 (C) 1953 (D) 1957 8. The word

"emerged" in line 20 is closest in meaning to (A) increased (B)

concluded (C) succeeded (D) appeared 9. The word "outlining" in

line 21 is closest in meaning to (A) assigning (B) studying (C)

checking (D) summarizing 10. Why do people still argue about who

deserves the credit for the concept of the laser? (A) The researchers

' notebooks were lost. (B) Several people were developing the idea

at the same time. (C) No one claimed credit for the development

until recently. (D) The work is still incomplete. Question 1121 Panel

painting, common in thirteenth -and fourteenth -century Europe ,

involved a painstaking , laborious process. Wooden planks were

joined, covered with gesso to prepare the surface for painting , and

then polished smooth with special tools. On this perfect surface, the

artist would sketch a composition with chalk, refine it with inks, and

then begin the deliberate process of applying thin layers of egg

tempera paint (egg yolk in which pigments are suspended) with

small brushes. The successive layering of these meticulously applied

paints produced the final, translucent colors. Backgrounds of gold

were made by carefully applying sheets of gold leaf, and then

embellishing of decorating the gold leaf by punching it with a metal rod on which a pattern had been embossed. Every step in the process was slow and deliberate . The quick-drying tempera demanded that the artist know exactly where each stroke be placed before the brush met the panel, and it required the use of fine brushes. It was, therefore , an ideal technique for emphasizing the hard linear edges and pure, fine areas of color that were so much a part of the overall aesthetic of the time. The notion that an artist could or would dash off an idea in a fit of spontaneous inspiration was completely alien to these deliberately produced works. Furthermore, making these paintings was so time-consuming that it demanded assistance. All such work was done by collective enterprise in the workshops. The painter or master who is credited with having created painting may have designed the work and overseen its production, but it is highly unlikely that the artist ' s hand applied every stroke of the brush. More likely, numerous assistants, who had been trained to imitate the artist ' s style, applied the paint. The carpenter ' s shop probably provided the frame and perhaps supplied the panel, and yet another shop supplied the gold. Thus, not only many hands , but also many shops were involved in the final product. In spite of problems with their condition, restoration, and preservation many panel paintings have survived, and today many of them are housed in museum collections.
