Directions: There are four passages in this Part. Each Passage is followed by some questions or unfinished statements. For each of them there are four choices marked A, B, C, D. You should decide on the best choice and mark the corresponding letter on the Answer Sheet with a single line through the center. Passage I Questions 1 to 5 are based on the following passage: What will man be like in the future - in 5000 or even 50000 years from now? We can only make a guess, of course, but we can be sure that he will be different from what he is today. For man is slowly changing all the time. Let us take an obvious example. Man, even five hundred years ago, was shorter than he is today. Now, on average, men are about three inches taller. Five hundred years is a relatively short period of time, so we may assume that man will continue to grow taller. Again, in the modern world we use our brains a great deal. Even so, we still make use of only about 20% of the brain's capacity. As time goes on, however, we shall have to use our brains more and more, and eventually we

shall need larger ones. This is likely to bring about a physical change too the head, in particular the forehead, will grow larger. Nowadays our eyes are in constant use. In fact, we use them so much that very often they become weaker and we have to wear glasses. But over very long period of time it is likely that man ' s eyes will grow stronger. On the other hand, we tend to make less use of our arms and legs. These, as a result, are likely to grow weaker. At the same time, however, our fingers will grow more sensitive because they are used a great deal in modern life. But what about hair? It will probably disappear from the body altogether in course of time because it does not serve a useful purpose any longer. In the future, then, both sexes are likely to be bald. Perhaps all this gives the impression that future man will not be a very attractive creature to look at . This may well be true. All the same, in spite of all these changes, future man will still have a lot in common with us. He will still be a human being, with thoughts and emotions similar to our own.

1. The passage tells us about\_\_\_\_\_. [A]how man ' s life will be in the future [B]how future man will look like [C]the fact that man ' s organs will function differently in the future [D]the fact that man is growing uglier as time passes

2. There is evidence that man is changing\_\_\_\_\_. [A]man has been growing taller over the past 500 years [B]man has got stronger eyes than he ever had [C]man ' s hair is getting thinner and thinner [D]man ' s limbs are getting weaker because he tends to make less use of them

3. Man ' s forehead will grow larger because\_\_\_\_\_. [A]he will use of only about 20% of the brain ' s capacity [B]the other 80% of his brain will grow in due time

[C]he had rather narrow forehead a few hundred years ago [D]he will have to use his brain more and more as time goes on 4. Future man will probably\_\_\_\_\_. [A]have smaller eyes [B]see better [C]have larger eyes [D]gave to wear better glasses 5. The reason for believing that future man will be different is that he\_\_\_\_\_. [A]is always [B]hopes for a change [C]never stops changing [D]will live a different life

Passage 2 Questions 6 to 10 are based on the following passage: People all over the world today are beginning to hear and learn more and more about the problem of pollution. Pollution is caused either by man ' s release of completely new and often artificial (人造)substances into the environment, or by releasing greatly increased amounts of a natural substance (物质), such as oil from oil tankers into the sea. Whatever its underlying reasons, there is no doubt that much of the pollution caused could be controlled if only companies, individuals and governments would make more efforts. In the home there is an obvious need to control litter and waste. Food comes wrapped up there or four times in packages that all have to be disposed of. drinks are increasingly sold in bottles or tins which cannot be reused. This not only causes a litter problem, but also is a great waste of resources, in terms of glass, metal and paper. Advertising has helped this process by persuading many of us not only to buy things we neither want nor need, but also to throw away much of what we do buy. Pollution and waste combine to be a problem everyone can help to solve by cutting out unnecessary buying, excess use and careless disposal (处理) of the products we use in our daily lives. 6. The main cause of pollution is\_\_\_\_\_.

[A]the release of artificial or natural substances into the environment  
[B]the production of new industrial goods [C]increased amounts of  
a natural substance [D]our ever-increasing population 7. Much of  
the pollution could be controlled if only\_\_\_\_\_. [A]people would  
pay more attention to the problem [B]governments would take  
effective measures [C]all sides concerned would make more efforts  
[D]farmers would use less artificial fertilizers 8. Food packages,  
bottles and tins for drinks can cause\_\_\_\_\_. [A]air and water  
pollution [B]both a litter problem and a waste of resources [C]to pay  
for the service [D]to produce the receipt 100Test 下载频道开通 ,
