Or should they let their children decide for themselves how to spend their free time? before answering these two qusetions, we should first of all ask another question: do children know how to plan to spend their free time? The answer to this question is both "yes" and "no". Our common sense tells us that some children spend their free time in a planned way while some others, especially the younger ones, just play as they like without any pain at all. The above answer leads to three more relevant questions about those children who know how to plan their leisure time: How

have they obtained the ability? Is the ability innate? Or is the ability learnt? Our observations tell us that this ability is not born but learned from others---their parents, teachers, other adults, or other children. With these questions settled, the answer to the first two questions should be very clear. Parents should not give their children a free hand at the beginning. Instead, they should plan their children's leisure time carefully, making sure that their children understand why they should have a plan. In this way, the children will gradually form a habit of making plans and know how to make a good plan. Then, we can say these children know how to spend their leisure time. When children already know how to spend their free time, they will not need any longer for the parents to plan for them. The most they can do is to keep an eye on their children's activities and give some guidance or advice when necessary. For most of the time, children should be allowed to decide for themselves. The whole process is in fact a process of training, in which instruction, demonstration and practice should be planned in a scientific way. Without plenty of practice, the whole process of learning would be a failure.

范文写法说明:来源:考试大 文章采用较为复杂的辩证分析方式,肯定了两种方法正确的一面,指出了阶段性区别,最后提出自己的观点.本文采用归纳法写作,以两个问题为引题,从问题到问题,步步紧扣,最后使问题都得到答案,从而得出结论.最后在结论的基础上提出自己不同的见解.

第一段: 时间计划问题,有的孩子懂,有的不懂 第二段: 计划能力是后天学会的 第三段: 初期应由家长帮之计划来源: 考试大 第四段: 后期应放手让孩子自己计划
