----- question 17) what will happen if you attempt to compile and run the following code? class base {} class sub extends base {} class sub2 extends base {} public class cex{ public static void main(string argv[]){ base b=new base(). sub s=(sub) b. } } 1) compile and run without error 2) compile time exception 3) runtime exception answer to question 17

----- question 18) which of the following statements are true? 1) system.out.println(-1 >>> 2).will output a result larger than 10 2) system.out.println(-1 >>> 2). will output a positive number 3) system.out.println(2 >> 1). will output the number 1 4) system.out.println(1 answer to question 18

----- question 19) what will happend when you attempt to compile and run the following code? public class tux extends thread{ static string sname = vandeleur. public static void main(string argv[]){ tux t = new tux(). t.piggy(sname).

```
system.out.println(sname). } public void piggy(string sname){  
sname = sname wiggy. start(). } public void run(){ for(int i=0.i  
sname = sname i. } } } 1) compile time error 2) compilation and  
output of vandeleur wiggy 3) compilation and output of vandeleur  
wiggy 0 1 2 3 4) compilation and probably output of vandeleur but  
possible output of vandeleur 0 1 2 3 answer to question 19
```

----- question 20) what will be displayed when you attempt to
compile and run the following code //code start 100Test 下载频道
