China ' s State Forestry Administration says the loss of vegetation and the effects of global warming on glacial areas are damaging sensitive areas. Local government in Tibet is monitoring dozens of riverheads but the main focus is on the vegetation, lakes, and glaciers around Mount Everest. The Qinghai-Tibet Plateau is home to China ' s several major rivers, such as the Yangtze and Yellow Rivers. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
