坡0drop rapidly!to extend your ,somebody think that this phynomenon is affected by the event,do you agree or disagree!?and what your countrys state should do?=====

=====The popular view all over the world holds that the 911 event hasgreatly ( affect ) AFFECTED the economics not only in USA but also ( all countries. ) ALL OVER THE WORLD。 Yet the truth ( is ) THAT global economic collapsed WAS not because people were disappointed and sad but the structure was not suitable for global production.We know in past 10 years the IT industry played an important rolein US. The fast increasing economic of US also encouraged theglobal industry because US was the Top1 country of inlet that ITindustry needed and hardware (especially processor) producer.However,the IT industry is so vulnerable that any unpredictablefactors such as earthquakes in Taiwan island in 2000 could influenceit (Taiwan collects most of the mainboard and EMS memoryproducers). The relationship of the economics among the countriesis like human beings nerve system. Once a place turn wrong,theothers will feel

pain. So it is true that the 911 is a main signal of economic depression instead of the cause. Additionally, we can say the phenomenon is a symptom of the weakness. If take a look at the structure of economics in US, we will find out that it's like a pyramid. The IT has taken up so many places on the top that when the bubble economic is broken, the confidence of people will have gone with the wind. Fortunately, Chinese are not greatly suffered from it as other western countries because China is also a big agriculture country. But to avoid the incident like 911 and the economic depression the department of the state should make slightly control on the fast developing of some industries and enact a law.

说真话，这篇文章写的很好，但只是IT业并不能代表全部，如你所述，它只是其中因素之一，但你接下来几乎都在讨论IT，最后结尾也如此，有点以偏盖全。从文法方面说，的确是篇不错的习作。 ----- 来源:【100test社区】
