What should education consist of to fulfill both these functions? With the rapid development of modern society, education is becoming more and more crucial to both individuals and societies. The issue over what education should consist of has considerably aroused people's wide concern. In this essay, I seek to explore this complicated topic from diverse perspectives and what influence could be brought. Among the most important aspects education should consist of, one should be stressed is professional knowledge education. On one hand, under the fierce competitive circumstance, people who have professional skills and experience attract many big companies. Therefore, study about one special area gives people more opportunities to hunt an ideal job. On the other hand, this education is also significant to develop societies in a long run. At the second place, what is also worth noticing is that physical education is necessary for students, especially for teenagers. If you want to achieve successfully in the modern societies, strong body is the first premise, which makes you always in sharp. So education should push people to take care themselves and this could bring great benefits to the healthy society. Last but not least, we should not lose sight of psychological education. Psychological problems are serious nowadays and a sizable percentage of people suffer from

them. A survey conducted by a famous research organization indicates that over 40 percent of students have various psychological problems, who really need help from school and society. Even worse, if such problems cannot be solved, they could hamper the progress of well-being society. Judging from what I have been discussed above, we may safely draw the conclusion that three aspects cannot be separated in education, which play vital important roles in the growth of individuals and societies. The fulfillment of both people and societies can be done as long as we lay emphasis on three aspects mentioned above. 作者：启德雅思学生Caroline Lau (刘颖妍)此文在3月12日雅思考试中获得七分。与百考试题网友共勉之。100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
