6.全球化教会我们什么？ 7.钱能干什么？ 8.对国内外企的期望. 9.科技对我们生活的影响. 10.做科学的消费者. 经济与科技（6）WHAT DOES GLOBALIZATION TEACH US?

Globalization is not only the very reality or the trend we face now, but also a point of view and a research means(研究方法)for the modern people. But what does globalization teach us? Firstly, globalization is a kind of human civilization, its development is just a new form of the latter one, indeed the definition and structure of civilization image constitute the major aspect of globalization in the long run. Secondly, globalization is human-beings future, and a sound global management is its destination. It offers the global village a common market, a balancing-benefited political sphere and the more amp. delicious food to enjoy. With money he can do what he likes. Money is so important and so useful that people are keen to possess it. But money can be a source of evil. For the sake of money, some people do not care about the means of getting it. They would steal, gamble, cheat amp. live within their income. In short, money is important amp. information in this huge market, and they in many ways have a big impact on people ' s lives. But what are our expectations of these partners or competitors? In short, treat employees amp. set examples of decency, fairness amp. competitiveness. Why? Partly because such behavior should be the

ethical core of a company, and partly because it helps a lot to be responsible. To be seen as being responsible, companies will find it easier to hire and gain social approval and work. While life turns easier in some way, technology has had terrible consequences for many people. In other words, people are suffering the changes brought by technology. For instance, millions of people are out of work today, and their unemployment is caused by machines that can do the work people used to do. In addition, managers who can not adjust to computers and physical health. To be a scientific consumer, firstly we should learn some consumption knowledge to guide our daily expenditure and take the best advantage of our limited income. Secondly, we are supposed to deal with the present and correct way to consume so as not to waste or pollute our natural resources. Finally, the consumption structure is being perfected with the development of scientific technology and social economics. And this is the very thing we name as the scientific consumption.
