1.从APEC到WTO 2.我们生活中的IT 3.钱是什么？ 4.网上购物.
5.如果没有电 经济与科技（1）来源

: www.examda.com FROM APEC TO WTO Nowadays, there is a saying going round that China ' s membership of WTO and successful hosting for Olympic as well as APEC in China this year are China ' s three active steps in the involvement of the world economical system. Before China became a member of WTO, APEC has been China ' s only participation in the international economic organization, and it has always been the important tribune to pass on China ' s reform and opening information and to promote regional economic co-operations. In the mean time, China also regards APEC as an important channel and system to connect its economics to the regional and world market, and most of China ' s policies on reducing tariff were declared in APEC, so in fact China has taken APEC as a preparing school for WTO. In a word, on behalf of a para- member of WTO, China is there to give an active push to the new negotiation of WTO in Shanghai, and this will surely make an encouraging influence on Dawhah conference in

November. 经济与科技（2）来源：www.examda.com IT IN OUR LIFF AT the beginning of the 20th century, there were four means of transmitting amp. telephone. In 1964, the Olympic Games in Tokyo became the first program to be transmitted via satellite. The

combination of satellites, which transmit information, computers, which store information, and entertainment centers. In theory, every person will have access to an unlimited amount of information, and people are able to shop from homes, do banking without leaving the house, watch any movie they want on television as well as enjoy soho life. IT make information from around the world available to be used quickly and in bank accounts. Money serves a number of functions as following: Firstly, as a generally accepted medium of exchange, money rules out the need for barter, the direct exchange of one item for another. Secondly, money provides a unit of account that serves as a standard to measure value, e.g., the concept of GNP will be useless without a standard of value such as the dollar. Thirdly, money can also serve as store of value that can be quickly converted to goods and services without any inconvenience or cost.

(4) 来源 : www.examda.com SHOPPING ON THE LINE

Nowadays, Internet is revolutionizing our globe and timesaving. Others argue that customers can never be assured of the quality of the commodities unless they see them with their own eyes.

Therefore, they don't show any interest in shopping online.

Anyhow, it's believed that shopping on the net will be an irresistible trend of shopping in the 21st century. 经济与科技 (5

) WHAT WOULD HAPPEN IF THERE WERE NO

ELECTRICITY Ever since early this century, electricity has been playing an essential role in our modern life. Take modern buildings for example, it is electricity that lights rooms and makes such modern wonders as TV sets, refrigerators and air-conditioners work. More

important is, it is electricity that pushes elevators& running water up skyscrapers.No doubt ,it plays a part in our modern life as the role blood does in human body. If there were no electricity, our modern life would be badly crippled. Without electricity, all modern wonders would be reduced to uselessness. Without elevators, running water, communications, lights and air-conditioners in certain areas, skyscrapers and other modern buildings would be unfit for people to live in for lack of electricity. In brief, there would be no electricity-based modern life. Therefore, we should on the one hand save as much electricity as possible, on the other hand utilize more source of electricity. 100Test 下载频道开通 , 各类考试题目直接下载。详细请访问 www.100test.com
